

Java

```
class Solution {  
    public String countOfAtoms(String formula) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string} formula  
 * @return {string}  
 */  
var countOfAtoms = function(formula) {  
  
};
```

TypeScript

```
function countOfAtoms(formula: string): string {  
  
};
```

C++

```
class Solution {  
public:
```

```
    string countOfAtoms(string formula) {  
  
    }  
};  
-----
```

C#

```
public class Solution {  
    public string CountOfAtoms(string formula) {  
  
    }  
}
```

Kotlin

```
class Solution {  
    fun countOfAtoms(formula: String): String {  
  
    }  
}
```

Go

```
func countOfAtoms(formula string) string {  
  
}
```
